DATA AUTOMATION PROPOSAL

"Precision in Process, Power in Performance"

San José, Costa Rica
October 2025

CLIENT: XYZ Industrial Corporation S.A.
ATTENTION: Operations Management

Dear   Sir/Madam,

It is my pleasure to present this proposal for the development and implementation of a Data Audit Automation System, specifically designed to optimize your organization's operational processes.

Based on my proven experience reducing processing times by 92% (from 6 hours to 45 minutes) in similar projects, I guarantee a scalable, reliable solution with high impact on your business metrics.

PROJECT SCOPE

Deliverable	Description
System Analysis & Design	Current process evaluation, data architecture design, technical requirements definition.
Automated Pipeline Development	Python system implementation with Polars framework for high-performance processing.
Quality Validation Framework	Automated validation system with anomaly detection and real-time alerts.
Integration with Existing Systems	Connection with Oracle databases, corporate APIs, and BI tools.
Technical Documentation	Complete code, architecture, and operational

	procedures documentation.
Team Training	Training sessions for technical and operational users.
Post-Implementation Support	Guaranteed technical support for 3 months, including adjustments and optimizations.

ESTIMATED TIMELINE

• Phase 1 - Analysis & Design: 2 weeks
• Phase 2 - Core Development: 4 weeks
• Phase 3 - Integrations & Testing: 2 weeks
• Phase 4 - Training & Deployment: 1 week
• Phase 5 - Support & Optimization: 3 months

TOTAL PROJECT DURATION: 9 weeks + 3 months support

INVESTMENT

Complete Development & Implementation	₡3,500,000
Post-Implementation Support (3 months)	Included
Future Updates	Quoted separately
TOTAL INVESTMENT	₡3,500,000

IMPORTANT NOTES

• Project initiation requires 40% advance payment of total amount.
• Additional 30% invoiced upon Phase 2 completion (Core Development).
• Remaining 30% invoiced upon final delivery and completed training.
• Project includes basic web accessibility and technical standards compliance.
• Future system updates or modifications will be quoted separately.
• Source code and documentation remain client property.
